

Instructions for Simple Classification Matching Cards

This PDF is laid out as a grid. The grid lines should be used as a guide when cutting.

Each picture can be mounted on white card or paper and laminated.

Each card should be similar in size.

A Heading Card which can be used with this exercise is included in this pdf. It can be mounted on any colour Paper/Card.

After an initial presentation where the child is introduced to the concept of animals with shells the cards can be used as a simple matching exercise.

The teacher can reinforce the child's learning by asking the child the identity of the animal and telling the child the identity if unknown.

Colour dots can be used and placed on the reverse of the pictures. The colour used should correspond to the colour of the heading card.

All downloads are for your personal use and can be used within your setting but cannot be sold or uploaded to your own website or social media page.

Animals included in this PDF are:

turtle

tortoise

snail

limpet

lobster

crab

animals that have shells
