

## Instructions for 2 part Cards – Parts of the Tree

The following pages contain pictures of trees. On each page is a tree with a part of it highlighted in red and the name of the highlighted part underneath the picture. A duplicate picture without the name underneath the picture is also on each page. Name cards and a black line master are included. Print page 2-6 on white paper/card. Using the line down the middle of the page separate each picture, trim and mount on green card/paper so a green border is visible. Print page 7 on white paper/card. Using the grid lines as a guide separate each name card, trim and mount on slightly bigger green card/paper so a green border is visible.

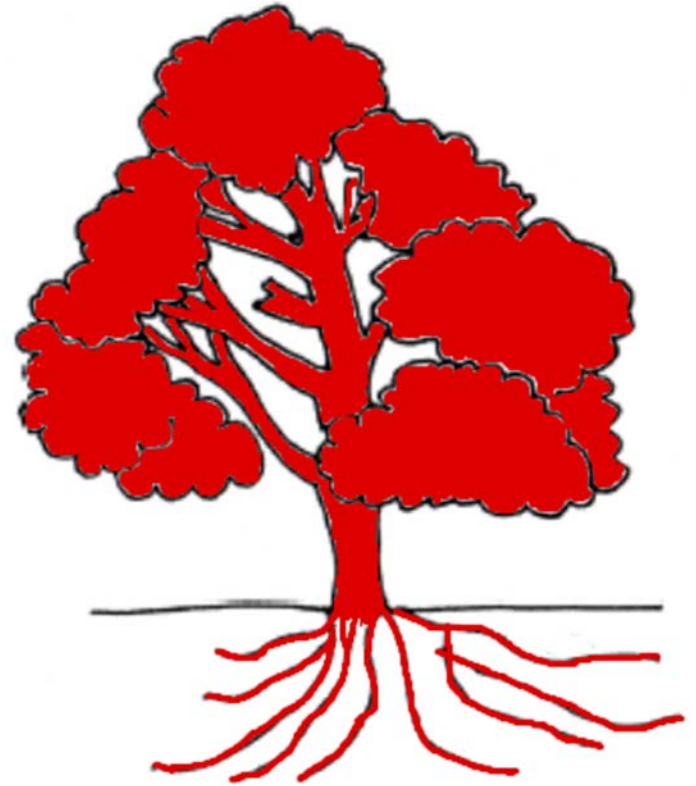

This material can be used in several ways:

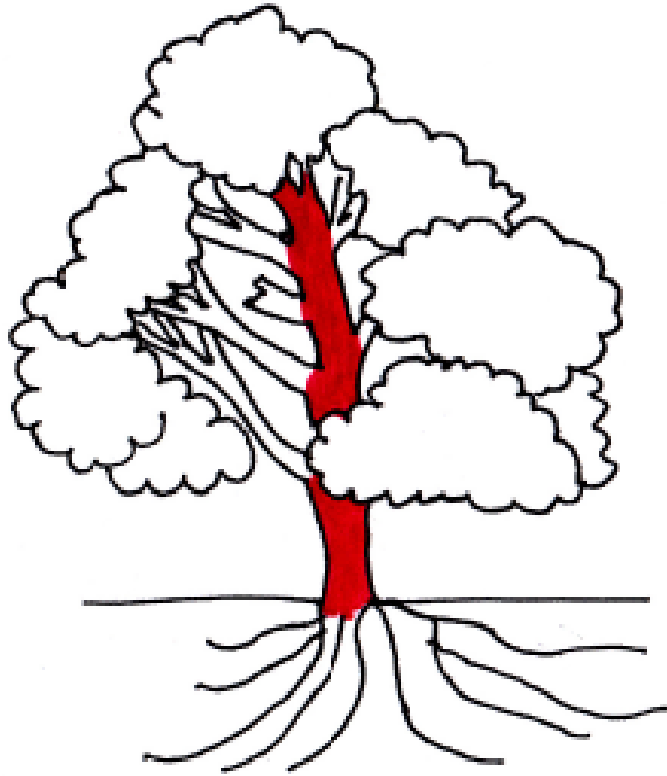

1. Print the unnamed pictures twice and use as a simple matching exercise using just the pictures
2. As a more advanced matching exercise using one set of pictures with name cards attached as a frieze (stuck together like a book) and the other set of pictures with the name cards separated from the picture (loose). The child uses the frieze as a control, places the pictures down and matches the right name card to the right picture.
3. As the child becomes more confident he/she can lay out the frieze as before but turn it so the picture cannot be seen. The child matches the unnamed card and the name card. Once the work is complete the child check his/her work by referring to the control.
